# WE'RE ALWAYS PULLING FOR YOU.

Save money, time and effort by exploiting the full potential of your Motrec tow tractor, burden carrier or stock chaser. Our tracking trailers are a simple and economical way to get more done in less time. With their tight turning radius and heavy-duty construction, our industrial trailers are strong and sturdy, but also highly maneuverable. These indispensable work tools are built specifically for Motrec electric vehicles, and can be easily customized for specific jobs if needed.

# BUILT FOR YEARS OF HEAVY-DUTY WORK.

Ruggedly built for use in trains, each trailer features a forged steel towing loop and solid pneumatic wheels, perfect for heavy duty towing applications. The Four-Wheel steering assures minimum floor space required for turning entire train, a significant cost advantage in a larger warehouse or distribution center. The steel deck accommodates virtually any kind of load and is forgiving of most loading and unloading indiscretions. Each trailer is equipped with mitered corners and indicative of premium design which allows for tight trailering turns without corner contact. Pintle hitch comes standard.
